Note Reading for Violin

This book will make the Suzuki parent's task much easier as it will provide a reference when a parent does not know how to teach new pieces. The teacher's job will be easier too because it will no longer be necessary to explain to the parent the relationship between notes and violin fingerings. This book is well-illustrated so that mothers and advanced children can easily understand by reading and looking at the pictures. Dr. Suzuki explains, step-by-step from open strings to placing fingers, what happens to the fingers when there are sharps, flats, and naturals on the page. He explains rhythms and how to read the higher positions. When the child is young, a parent can point to the illustrations and explain easily. There are many nice pieces for reading practice towards the end of the book.

Quarter Notes and Friends

QUARTER NOTES AND FRIENDS is a string method book designed for the 1st year elementary music student. It differs from other method books in a number of ways. Here are two vital areas. First, it is the only book that develops the student's steady beat/counting skills. This beat development is presented and practiced in an easy to do, understandable, progression directly connected to the written music notation. The second major difference is the organization of the material. The book has five general sections. Once students acquire the beginning skills, the teaching of virtually any page after the first section is possible. This design permits the teacher to select and teach lessons according to the needs of the class. QUARTER NOTES AND FRIENDS is innovative in a number of areas: 1. rhythm development linked directly to the steady beat, 2. three different starting pages, 3. the education of sharps, flats, and naturals, 4. the book's layout, 5. teacher freedom to choose what, when, and how to teach a lesson, 6. a fingering chart that may be played together by all instruments. The goal of QUARTER NOTES AND FRIENDS for the student is to learn to play, read and sight-read written music notations; to play with a steady beat, to develop excellent instrument skills, to develop physical skills, to develop musicianship. The goal of QUARTER NOTES AND FRIENDS is to provide the instructor with a tool: that permits the instructor to teach the material when and how they desire, that develops a steady beat/counting, that develops reading and playing written music notation, that provides ample amounts of music for the development of sight-reading and instrument skills. QUARTER NOTES AND FRIENDS consists of over 250 song/exercises and 4 major scales, visually connects the beat to the notes, uses addition to introduce longer duration notes, perfect for the once or twice a week music program; ideal for string classes, ensembles, or individual instruction; comprised of fun familiar, international, and specialty design songs. Sight Reading Violin Music

“I can play, but I can't read music!” The answer to this frustrated cry is right here. “Sight Reading Violin Music” lets you use your ear to get started. Then, you will use symbols along with your ear in the speed builders. Finally, you will use only the symbols to ‘figure out’ the short pieces in each key. You will cover the major keys through four accidentals (sharps and flats). You will know the difference between major and minor. “It all looks like chicken scratch to me!” No problem. Use the finger charts and diagrams first. Or try the single-line staff; get someone to help write out some other songs you know in single-line notation. “My Twinkle beginners get the parts of the song mixed up; then, they forget where they are in the song.” This little snafu is universal. Use the icon cards in the appendix. The “B” section of Twinkle is shaded. This gives the young student a much needed picture of the ABA form.
