Subjects in Constructions – Canonical and Non-Canonical

This volume analyzes constructions with non-canonical subjects in individual languages and cross-linguistically, drawing on insights from cognitive and discourse-functional linguistics. Prototypical subjects have often been characterized in terms of their semantic, syntactic and discourse features, such as animacy, agentivity, topicality, referentiality, definiteness and autonomy of existence of the subject referent. A non-canonical subject is one that lacks some of these features. This may be reflected in its meaning, grammatical coding, and/or discourse function. In discussing non-canonical subjects in individual languages and cross-linguistically, the chapters in the volume address the following more general topics: What kinds of grammatical, semantic and discourse criteria can be used to distinguish subjects from non-subjects? To what extent are subject criteria construction-specific? What kinds of constructions have non-canonical subjects? What are the semantic and discourse functions of constructions with non-canonical subjects? Are subjects which are grammatically non-canonical also atypical in terms of their discourse features?

Is Europe Christian?

As Europe wrangles over questions of national identity, nativism and immigration, Olivier Roy interrogates the place of Christianity, foundation of Western identity. Do secularism and Islam really pose threats to the continent's 'Christian values'? What will be the fate of Christianity in Europe? Rather than repeating the familiar narrative of decline, Roy challenges the significance of secularized Western nations' reduction of Christianity to a purely cultural force- relegated to issues such as abortion, euthanasia and equal marriage. He illustrates that, globally, quite the opposite has occurred: Christianity is now universalized, and detached from national identity. Not only has it taken hold in the Global South, generally in a more socially conservative form than in the West, but it has also 'returned' to Europe, following immigration from former colonies. Despite attempts within Europe to nationalize or even racialize it, Christianity's future is global, non-European and immigrant-as the continent's Churches well know. This short but bracing book confirms Roy's reputation as one of the most acute observers of our times. It represents a persuasive and novel vision of religion's place in national life today.

This book addresses cross-cultural representations of ethnic minority peoples by dominant society 'outsiders' and indigenous self-representation in the context of the 'New Media Nation'. In doing so, it explores the role of language, culture, identity and media in liberation struggles and the emergence of new political entities, and opens up issues of colonial oppression to public debate. It is intended to help inform policy in a variety of settings. Grounded in current perspectives on diaspora and homeland and drawing on Alia's work on minorities, media and identity as well as Bull's work on Maori socio-cultural issues and criminalisation of minorities, this volume offers a comparative, international perspective on the experiences of a broad range of ethnic minority peoples. These include Inuit and First Nations people in Canada; Native Americans and African Americans in the United States; Sami in northern Europe; Maori in New Zealand; Aboriginal people in Australia and Roma in Ireland and Britain.

The East European Gypsies

The first novel in Arno Camenisch's celebrated \"alpine\" trilogy is set during a single summer. The four main (unnamed) characters are a dairyman, his farmhand, a cowherd, and a swineherd who all live and work in close proximity--but this is no \"Heidi.\" Theirs is an existence marked by dangerous work, solitude, cruelty, alcoholism, and sheer stubbornness; but the author's handling of these situations and lives is characterized at all times by affection, surreal humor, and a brilliant ear for the sounds of the setting.

The Merck Manual of Diagnosis and Therapy

Explains the science behind the practice of nei kung, the elemental nature of yin and yang energy--the two components of ch'i, and how learning to control the yang energy in our ch'i can result in the release of dynamic energy. • Establishes the existence and understanding of nei kung in the practices of many of the world's ancient cultures. • Includes a step-by-step guide to the meditation that forms the basis of the practice of nei kung. • By Kosta Danaos, author of The Magus of Java and apprentice to an immortal of the Mo-Pai tradition. In 1994 Kosta Danaos was accepted as a student by John Chang, a Chinese-Japanese Taoist in the Mo-Pai tradition and a master of nei kung, the practice of harnessing and controlling our body's bioenergy, or ch'i. Nei Kung: The Secret Teachings of the Warrior Sages describes the practice of nei kung and how

learning to control our ch'i can result in the release of dynamic energy that can be used for healing, pyrogenesis, telekinesis, levitation, telepathy, and more. Danaos suggests that both components of ch'i--yin and yang energy--are fundamental to the earth and to life and were recognized and used in many of the world's ancient cultures. Though we have forgotten how to access them, these components are in fact elemental parts of us. The author explains that we first must open our minds to the fact that the power of ch'i is real. Next, in learning to control our ch'i as a whole, we must learn to channel our yang energy in productive ways--a potential we all possess. To help readers understand their capacity to connect with this inner elemental power, the author offers a fascinating blend of teachings that include sound scientific theories explaining much of the \"magic\" of nei kung. He also offers historical, linguistic, artistic, and literary proof of the presence and understanding of nei kung throughout the ages and a step-by-step introduction to several types of simple meditation--fundamental to directing one's ch'i. With his engaging storytelling and disarming humor, his physics-based explanations for seemingly mystical phenomena, and his reassurances that he's really no different from the rest of us, Kosta Danaos shows us that once we remember our capacity to harness our yang energy, we can change ourselves and our world.

One of the greatest challenges during the enlargement process of the European Union towards the east is how the issue of the Roma or Gypsies is tackled. This ethnic minority group represents a much higher share by numbers, too, in some regions going above 20% of the population. This enormous social and political problem cannot be solved without proper historical studies like this book, the most comprehensive history of Gypsies in Romania. It is based on academic research, synthesizing the entire historical Romanian and foreign literature concerning this topic, and using lot of information from the archives. The main focus is laid on the events of the greatest consequence. Special attention is devoted to aspects linked to the long history of the Gypsies, such as slavery, the process of integration and assimilation into the majority population, as well as the marginalization of Gypsies, which has historic roots. The process of emancipation of Gypsies in the mid-19th century receives due treatment. The deportation of Gypsies to Transnistria during the Antonescu regime, between 1942-1944, is reconstructed in a special chapter. The closing chapters elaborate on the policy toward Gypsies in the decades after the Second World War that explain for the latest developments and for the situation of this population in today's Romania.

The Pyramids of Giza are the only one of the Seven Wonders of the World that still stands today. The Pyramids of Giza

This book takes a long hard look at the text-messaging phenomenon and its effects on literacy, language, and

society. Young people who seem to spend much of their time texting sometimes appear unable or unwilling to write much else. Media outrage has ensued. "It is bleak, bald, sad shorthand," writes a commentator in the UK Guardian. "It masks dyslexia, poor spelling, and mental laziness." Exam answers using textese and reports that examiners find them acceptable have led to headlines in the tabloids and leaders in the qualities. Do young people text as much as people think? Do adults? Does texting spell the end of literacy? Is there a panic in the media? David Crystal looks at the evidence. He investigates how texting began and who uses it, why and what for. He shows how to interpret its mix of pictograms, logograms, abbreviations, symbols, and wordplay, and how it works in different languages. He explores the ways similar devices have been used in different eras and discovers that the texting system of conveying sounds and meaning goes back a long way, all the way in fact to the origins of writing - and he concludes that far from hindering literacy, texting may turn out to help it. The story of John Chang, the first man to be documented performing pyrokinesis, telekinesis, levitation, telepathy, and other paranormal abilities. • The author, a mechanical engineer, provides scientific explanations of how these powers work. • For the first time, the discipline of Mo-Pai is introduced to the West. In 1988 the documentary *Ring of Fire* was released to great acclaim. The most startling sequence in the film is that of a Chinese-Japanese acupuncturist who demonstrates his full mastery of the phenomenon of chi, or bio-energy, by generating an electrical current within his body, which he uses first to heal the filmmaker of an eye infection and then to set a newspaper on fire with his hand. *Ring of Fire* caused thousands to seek out this individual, John Chang, in pursuit of instruction. Of the many Westerners who have approached him, John Chang has accepted five as apprentices. Kosta Danaos is the second of those five. In his years of study with John Chang, Danaos has witnessed and experienced pyrokinesis, telekinesis, levitation, telepathy, and much more exotic phenomena. He has spoken with spirits and learned the secrets of reincarnation. Most important, he has learned John Chang's story. John Chang is the direct heir to the lineage of the sixth-century b.c. sage Mo-Tzu, who was Confucius's greatest rival. His discipline, called the Mo-Pai, is little-known in the West and has never before been the subject of a book. Now, John Chang has decided to bridge the gap between East and West by allowing a book to be published revealing the story of his life, his teachings, and his powers. It will surely expedite what may well become the greatest revolution of the twenty-first century--the verification and study of bio-energy.

What is Subjective Communication? Subjective Communication is a natural ability that all of the highly successful people on our planet have in common. Subjective Communication is the ability that permits people to know more than their physical senses alone can tell them. Subjective Communication is the one “secret of success” that people have sought to reveal for thousands of years, yet remained hidden because those who had it did not realize that the way they functioned was different from the way the vast majority of people function, and those who didn't have it considered it so unlikely that they doubted its existence. For the fortunate few who, through natural means, developed the ability to use subjective communications to know more than the majority of people, life has been a fabulous success. These people - about ten percent of the population - are the ones we consider “lucky.” Though they do no more work than other people, they prosper. Though they are no more persistent than millions of others, they succeed while others fail. Though they are no more intelligent than the masses, we call them geniuses. You can develop this ability. All humans are born with the potential to communicate in more ways than through the physical senses. It is your mind, and your phenomenal imagination, that makes you human. In this book, you will learn why imagination is not only used for make believe, but is also used as a communications tool. You will learn exactly what human intelligence is, and what mind is, and how these function in another - invisible-to-the-human-eyes - dimension where we exchange vital information that helps improve our relationships, our decision making ability, and our chances for success and happiness in this life. You will have a rare opportunity to look inside the mind of a genius, a natural psychic who has been using this ability for more than sixty years, as this genius is interviewed by a veteran newspaper reporter turned researcher. This insight and understanding will help you develop your own abilities. Never before has there been a book like this one, that strips the mystery away and explains in simple language exactly what this thing called ESP really is and how you can learn to use it like the most successful people in our world do. It is your heritage as a human being. Use it.

Detta är, som alltid hos Cartarescu, en roman om Bukarest, en både drömd och verklig stad. Runt omkring i staden ligger jättelika underjordiska solenoider, magnetiska spolar som får hus, människor och föremål att levitera. Parallellt med berättelsen om staden möter vi en enkel landsbygdslärare, författarens alter ego, som rör sig i en drömlig, surrealistisk och hypnotisk verklighet.
