Bipin Chandra's book is a well-documented history of India's freedom struggle against the British rule. It is one of the most accurate books which have been painstakingly written after thorough research based on legal and valid verbal and written sources. It maps the first war of independence that started with Mangal Pandey's mutiny and witnessed the gallant effort of Sri Rani Laxmi Bai. Many of the pages of this book are dedicated to Mahatma Gandhi's non-cooperation and the civil disobedience movements. It contains detailed description of Subash Chandra Bose's weapon heavy tactics and his charisma. This book includes all the independence movements and fights, irrespective of their size and impact, covering India in its entirety. Although these movements varied in means and ideas, but they shared a common goal of independence. ## **Prominent Figures in India's Struggle for Independence**

This book presents an analysis of the foundations organised by the Birla family in India. Several generations were involved in the renovation and establishment of sanctuaries, temples and other sacral buildings. As a result, between 1933 and 1998, nineteen Birla Mandirs were established, mainly in northern and central India. All the temples have the capacity to surprise with their various decorative motifs, not seen in other places, which – apart from their aesthetic function – above all bear important symbolic content. Therefore, is it possible to treat the Birla Mandirs as a specific medium – the carrier of a particular message that is not only religious, but with a significance that permeates other layers of social and political discourse. This message, as the authors of the book claim, have a bearing on the socio-political thought of India – supported by the creation and propagation of ideas related to identity and a national art. It also conveys the idea of hierarchical Hindu inclusivism which, although considering all religions as equal, treats Hinduism in a unique way – seeing within it the most perfect form of religion, giving man the opportunity to learn the highest truth. The book also examines whether the temples founded by the Birla family and the religious activities undertaken therein apply the concept of “inventing” tradition, and whether traditions created (or “modernised”) in contemporary times are a way of enhancing the appeal of the message conveyed from temple to society. “The Vastness of Culture” is a series of publications presenting cultural studies and emphasizing the role of comparative research and analyses that reveal similarities, differences and intercultural influences. This book offers one of the first critical evaluations and in-depth analysis of the intellectual movement in Maharashtra in the 19th century. Arguing against the prevalent view that Indian rationality was imported from Europe through the colonial agency, it traces the rational roots of the movement to indigenous intellectual traditions and history. It also questions the centrality assigned to the 'Bengal Renaissance' as being the representative of the contemporary intellectual movement in the country. Strongly grounded in primary research, this volume brings forth many new facts and facets into the scholarly discourse on topics such as the idea of 'Drain' and the rise of Indian nationalism, so far seen as a predominantly political process divorced from its cultural dimensions. It re-examines the view that cultural consciousness that preceded political agitation was a separate sphere of activity and suggests that both were integral stages of anti-colonialism in the country. The author maintains that rationalism and nationalism were closely connected as a means-and-end continuum. He also provides a new and substantially different understanding of the 19th-century intellectuals Mahatma Jotirao Phule and Pandita Ramabai among others. Lucid, accessible and thought provoking, this book will interest scholars and researchers of modern Indian history, Indian political thought, sociology, philosophy and Marathi literature.

One prevalent socio-cultural structure that is peculiar to South Asia is caste, which is broadly understood in socio-anthropological terms as an institution of ranked, hereditary and occupational groups. This book discusses the enigmatic persistence of caste in the lives of South Asians as they step into the twenty-first century. It investigates the limits of sociological and secular historical analysis of the caste system in South Asia and argues for ways of describing life-forms generated by caste on the subcontinent that supplement the accounts of caste in the social sciences. By focusing on the literary, oral, visual and spiritual practices of one particular group of ex-untouchables in western India called 'Mahars', the author suggests that one can understand caste not as an essence that is responsible for South Asia's backwardness, but as a constellation of variegated practices that are in a constant state of flux and cannot be completely encapsulated within a narrative of nation-building, modernization and development.
