Antioch II

During the fourth century, Antioch on the Orontes was the most important imperial residence in the Roman Empire and a "hot-bed" of intellectual and religious activity. The writings of men such as Libanius, the emperor Julian, Ammianus Marcellinus, John Chrysostom, Theodoret, and many others, provide a density of written sources that is nearly unmatched in antiquity, while the archaeological evidence of the city's evolution is much harder to reconstruct. This volume assembles state-of-the-art scholarship on these ancient authors within the context of recent archaeological work to offer a rare comprehensive view of this late Roman city. Contributors: Rudolf Brandle, Gunnar Brands, Silke-Petra Bergjan, Susanna Elm, Johannes Hahn, Gavin Kelly, Blake Leyerle, Jaclyn Maxwell, Wendy Mayer, Yannis Papadogiannakis, Catherine Saliou, Adam M. Schor, Christine Shepardson, Jan R. Stenger, Claudia Tiersch, Edward Watts, Jorit Wintjes

The Global Translator's Handbook

This book investigates the role of the Latin language as a vehicle for science and learning from several angles. First, the question what was understood as 'science' through time and how it is named in different languages, especially the Classical ones, is approached. Criteria for what did pass as scientific are found that point to 'science' as a kind of Greek *Denkstil* based on pattern-finding and their unbiased checking. In a second part, a brief diachronic panorama introduces schools of thought and authors who wrote in Latin from antiquity to the present. Latin's heydays in this function are clearly the time between the twelfth and eighteenth centuries. Some niches where it was used longer are examined and reasons sought why Latin finally lost this lead-role. A third part seeks to define the peculiar characteristics of scientific Latin using corpus linguistic approaches. As a result, several types of scientific writing can be identified. The question of how to transfer science from one linguistic medium to another is never far: Latin inherited this role from Greek and is in turn the ancestor of science done in the modern vernaculars. At the end of the study, the

importance of Latin science for modern science in English becomes evident.

THE GAZETTEER'S; OR Newsman's Interpreter

Bringing together an international team of historians, classicists, and scholars of religion, this volume provides the first comprehensive overview of the extant Greek and Latin letter collections of late antiquity (ca. 300–600 c.e.). Each chapter addresses a major collection of Greek or Latin literary letters, introducing the social and textual histories of each collection and examining its assembly, publication, and transmission. Contributions also reveal how collections operated as discrete literary genres, with their own conventions and self-presentational agendas. This book will fundamentally change how people both read these texts and use letters to reconstruct the social history of the fourth, fifth, and sixth centuries.

Glass Moon Over Images of Sand presents a collage of brief narratives woven to stir the imagination. In these pieces, the author creates absurd realismthe coexistence of the absurd within what people call human reality. This book speaks to its readers with real fiction of edited memories. This collection of short narratives exposes readers to contemplate yesterday as a dream. Romay describes it as something like what

some writers experience within that encounter with absence when they internalize themselves into a sheet of blank paper in the present progressive digital world. Unquestionably, that yesterday that once was today is suspended in that labyrinth of memory. After all, this narrative subscribes to the premise that Reality only exists in language. The reason is that the reality of this work manifests itself if readers continue to read it offering more than one reading.

The Gazetteer's Or, Newsman's Interpreter. The Second Part ... The Second Edition

“Five times I received at the hands of the Jews the forty lashes less one. Three times I was beaten with rods. Once I was stoned. Three times I was shipwrecked.” Who was this man who had undergone such tribulations? For centuries, Paul’s letters have been read in a theological context, forming as they do part of the foundation of the Christian faith. This book, however, maintains that it is important to read these letters in a different way, to learn to analyse them in their original, contemporary context. It scrutinizes Paul’s letters, showing that the texts as we now have them form a kind of palimpsest in which other layers and text fragments are visible. It also studies Paul’s views on the resurrection, investigating Paul’s idea of the son of God and the sermon in Athens with whetted-knife precision. In addition, it deals with the alleged letter to the Romans and considers the trial of Paul and his burial place in Rome. In such ways, it poses questions about the authenticity of the Pauline letters and comes up with surprising answers. As such, it represents a fascinating study that breaks with many traditional beliefs and creates space for radical new insights.

The Balkans and the Near East share millennia of a joint history, which stretches from the settling of man to the 20th century. The task split between the various scholarly disciplines into the fields of Balkan studies and Near (Middle) East studies has resulted in dividing a shared history into various sub-histories. This book reunites these isolated histories, opening up completely new historical perspectives. (Series: Studies on South East Europe - Vol. 12)

Renaissance and Renewal in the Twelfth Century

The Bible and Jews in Medieval Spain examines the grammatical, exegetical, philosophical and mystical interpretations of the Bible that took place in Spain during the medieval period. The Bible was the foundation of Jewish culture in medieval Spain. Following the scientific analysis of Hebrew grammar which emerged in al-Andalus in the ninth and tenth centuries, biblical exegesis broke free of homiletic interpretation and explored the text on grammatical and contextual terms. While some of the earliest commentary was in Arabic, scholars began using Hebrew more regularly during this period. The first complete biblical commentaries in Hebrew were written by Abraham Ibn ‘Ezra, and this set the standard for the generations that followed. This book analyses the approach and unique contributions of these commentaries, moving on to those of later Christian Spain, including the Qimhi family, Nahmanides and his followers and the esoteric-mystical tradition. Major topics in the commentaries are compared and contrasted. Thus, a unified picture of the whole fabric of Hebrew commentary in medieval Spain emerges. In addition, the book describes the many Spanish Jewish biblical manuscripts that have remained and details the history of printed editions and Spanish translations (for Jews and Christians) by medieval Spanish Jews. This book will appeal to scholars and students of medieval Spain, as well as those interested in the history of religion and cultural history.

Interpreting Christian History

The twenty-eight essays in this Handbook represent the best of current thinking in the study of Latin language and literature in the Middle Ages. The insights offered by the collective of authors not only illuminate the field of medieval Latin literature but shed new light on broader questions of literary history, cultural interaction, world literature, and language in history and society. The contributors to this volume--a collection of both senior scholars and gifted young thinkers--vividly illustrate the field's complexities on a wide range of topics through carefully chosen examples and challenges to settled answers of the past. At the same time, they suggest future possibilities for the necessarily provisional and open-ended work essential to the pursuit of medieval Latin studies. While advanced specialists will find much here to engage and at times to provoke them, this handbook successfully orients non-specialists and students to this thriving field of study. The overall approach of The Oxford Handbook of Medieval Latin Literature makes this volume an essential resource for students of the ancient world interested in the prolonged after-life of the classical period's cultural complexes, for medieval historians, for scholars of other medieval literary traditions, and for all those interested in delving more deeply into the fascinating more-than-millennium that forms the bridge between the ancient Mediterranean world and what we consider modernity.

The Bible and Jews in Medieval Spain

There is no greater authority on the saints than Alban Butler, and his enormous research has been the standard reference on the subject for the last two and a half centuries. This new adaptation of Butler's multi-volume *Lives of the Saints* presents a modernized text for today's reader and provides an illuminating guide to these historic, symbolic, and foundational Christian men and women. Butler's daily readings from the lives and works of the saints offer readers of all backgrounds the opportunity to engage directly with these great figures. Butler's distinctive contribution to stories about saints was to turn attention away from the superhuman, miraculous themes that are prevalent in earlier works. He gives us saints who are examples of Christian living, who provide inspiration for our own lives, in every time and circumstance. As Butler writes: "They were once what we are now, travelers on earth. They had the same weaknesses we have. We have difficulties; so had the saints." Important features of this version include mention of recently canonized saints as well as those whose path to official sainthood is still in progress. Also included in the daily readings are more obscure saints whose lives and contributions to Christianity should not be forgotten.

Between Exaltation and Infamy

Edel Romay has been enriched by his travels and friendships with literary and plastic artists as well as intellectuals in Mexico, Europe, the United States and South America. His oeuvre literary and plastic has been influenced by great philosophers, poets and scientists. *A Brief Poesy, 1989-2004* invites us to look into the relationship within the brain and the cosmos, the word with being, reality with time. In other words, he challenges us to reflect upon what Martin Heidegger once declared: Language is the dwelling of the being. Moreover, Edel proposes the idea that without an observer, reality does not exist. Similarly, Romay encourages the internal dialog between I and You that reflects upon itself to construct a true I the symbiosis that exists between reader and author within the same person. You are the other that creates and recreates me when I am read, because without a You there is no I and vice versa. This in turn leads us to ponder in what the poet Octavio Paz asserted: The eyes speak, words look, looks think.

The Oxford Handbook of Medieval Latin Literature

A succinct and accessible text for teaching students how to interpret the New Testament This new textbook effectively introduces students to the art and craft of biblical interpretation. New Testament scholars Sherri Brown and Francis Moloney begin by orienting students to the world of the Bible, exploring contemporary methods for interpreting the biblical literature, and showing how the Old Testament is foundational to the formation of the New Testament. The book proceeds to lead readers through the books of the New Testament by genre: * The Narratives: Gospels and Acts * Paul and His Letters * Hebrews and the Catholic Epistles * Apocalyptic Literature and the Book of Revelation Unlike book-by-book introductory textbooks that tend to overshadow the primary biblical text with lots of detailed information, Brown and Moloney's Interpreting the New Testament actually facilitates the study of the New Testament itself. Their concluding chapter reflects on the challenge of the New Testament to our present world.
