Q Skills for Success, Level 3

Deep learning is often viewed as the exclusive domain of math PhDs and big tech companies. But as this hands-on guide demonstrates, programmers comfortable with Python can achieve impressive results in deep learning with little math background, small amounts of data, and minimal code. How? With `fastai`, the first library to provide a consistent interface to the most frequently used deep learning applications. Authors Jeremy Howard and Sylvain Gugger, the creators of `fastai`, show you how to train a model on a wide range of tasks using `fastai` and PyTorch. You'll also dive progressively further into deep learning theory to gain a complete understanding of the algorithms behind the scenes. Train models in computer vision, natural language processing, tabular data, and collaborative filtering. Learn the latest deep learning techniques that matter most in practice. Improve accuracy, speed, and reliability by understanding how deep learning models work. Discover how to turn your models into web applications. Implement deep learning algorithms from scratch. Consider the ethical implications of your work. Gain insight from the foreword by PyTorch cofounder, Soumith Chintala.

Q

Zorian Kazinski has all the time in the world to get stronger, and he plans on taking full advantage of it. A teenage mage of humble birth and slightly above-average skill, Zorian is attending his third year of education at Cyoria's magical academy. A driven and quiet young man, he is consumed by a desire to ensure his own future and free himself of the influence of his family, resenting the Kazinskis for favoring his brothers over him. Consequently, Zorian has no time for pointless distractions, much less other people's problems. As it happens, though, time is something he is about to get plenty of. On the eve of Cyoria's annual summer festival, Zorian is murdered, then abruptly brought back to the beginning of the month, just before he was about to take the train to school. Finding himself trapped in a time loop with no clear end or exit, he will have to look both within and without to unravel the mystery set before him. He does have to unravel it, too, because the loop clearly wasn't made for his sake, and in a world of magic even a time traveler isn't safe from those who wish him ill. Fortunately for Zorian, repetition is the mother of learning...

Q Skills for Success

Grammar Choices is a different kind of grammar book: It is written for graduate students, including MBA, master's, and doctoral candidates, as well as postdoctoral researchers and faculty. Additionally, it describes the language of advanced academic writing with more than 300 real examples from successful graduate students and from published texts, including corpora. Each of the eight units in Grammar Choices contains: an overview of the grammar topic; a preview test that allows students to assess their control of the target grammar and teachers to diagnose areas of difficulty; an authentic example of graduate-student writing showing the unit grammar in use; clear descriptions of essential grammar structures using the framework of functional grammar, cutting-edge research in applied linguistics, and corpus studies; vocabulary relevant to the grammar point is introduced—for example, common verbs in the passive voice, summary nouns used with this/these, and irregular plural nouns; authentic examples for every grammar point from corpora and published texts; exercises for every grammar point that help writers develop grammatical awareness and use, including completing sentences, writing, revising, paraphrasing, and editing; and a section inviting writers to investigate discipline-specific language use and apply it to an academic genre. Among the changes in the Second Edition are: new sections on parallel form (Unit 2) and possessives (Unit 5) revised and expanded explanations, but particularly regarding verb complementation, complement noun clauses, passive voice, and stance/engagement a restructured Unit 2 and significantly revised/updated Unit 7 new Grammar Awareness tasks in Units 3, 5, and 6 new exercises plus revision/updating of many others self-editing checklists in the Grammar in Your Discipline sections at the end of each unit representation of additional academic disciplines (e.g., engineering, management) in example sentences and texts and in exercises.

Essential Skills: Reading & Writing Grd 2

Reading and writing are skills which can be easily practiced in an English as a Foreign Language (EFL) environment, and are particularly important for academic improvement and life-long learning. The book includes an overview of theoretical and practical issues of methods of teaching EFL reading and writing, as well as some research on related topics in Georgia. It deals with such issues as theories of reading and writing, reading and writing activities, motivation, and assessment. It focuses on EFL, as, in Georgia, there is no English-language environment apart from the classroom where students can develop their communicative skills. The contributors to this volume work at the International Black Sea University, where tuition is mostly conducted in English, and, correspondingly, teaching English is one of the main research priorities.

Q:Skills for Success 2E Reading and Writing Intro Student Book

Reading, a complex and multi-faceted skill, is essential for life and academic success. While its mysteries still baffle first-language research, the nature of reading in a foreign language presents an even greater puzzle. However, given reading's importance for EFL students who study their specializations in English, and whose future employment may depend on their competence in it, researchers must continue to investigate foreign language reading and devise ways of improving students' capacity for it. Hence, this book, with its thorough coverage of up-to-date theory, practice and research, will be of great value in today's educational context. As they strive to understand reading and help EFL students to acquire it, researchers and language teachers will find much of value here.
