The video is applicable to the 04, 05, 06, 07, 08, 09

Subaru Outback, This ...

remove the oil drain plug

spray all the exhaust studs and nuts

remove the air box

remove the drive belt

loosen the hose clamps

loosen the ac tensioner belt pulley

unplug the main harness

remove the bell housing bolts from the top

drained all the coolant from the radiator and engine block

disconnect the electrical part of the bands

break the pump seal on the transmission side

the transmission up so that the motor mount bolts clear the crossmember
line up these two bottom studs with that transmission
lower the transmission with the floor jack
bolt up my housing transmission to the engine
tighten some of these top bolts
tighten up the transmission housing bolts to the engine
line up the torque converter bolts
get to the torque converter nuts-and-bolts
lift the harness
reinstall the excess rubber plug boot
remount the bolts for the wiring harness
pop the harness retaining clip
connect your electrical connector for the fan
hook up the electrical connector
install the alternator
mount my adjustable adjustable bolt
get the belt over the ac pulley
tighten up the mounting bolt
snag up the adjuster bolt mounting bracket
plug in the internal regulator on the alternator
put in the overflow tank
connect it to the radiator
mount the lower radiator hose
line up the studs on the down pipe
put the lock nuts on the stud to the heads
install the battery
fill up the radiator
find the location of the efi fuse or the fuel pump
replace my fuel pump fuse
put the splash shields back up
