What if everything you know about raw talent, hard work, and great performance is wrong? Very few people are truly great at what they do. But why aren't they? Why don't we manage businesses like Warren Buffett, play golf like Tiger Woods or play the violin like Itzhak Perlman? Greatness doesn't come from inborn talent but from 'deliberate practice'. This isn't the kind of hard work that your parents told you about, but more of it equals better performance. Talent is Overrated will change the way you think about your life and work - and will inspire you to achieve more in everything you do. Great performance isn't reserved for a preordained few.

Recent years have brought global expansion of private supplementary tutoring alongside regular school systems. This expansion has far-reaching implications for the nurturing of new generations, for social and economic development, and for the operation of school systems. Some dimensions are positive while other dimensions are problematic. Supplementary tutoring is especially visible in Asia. The formats of tutoring range from one-to-one provision to large classes. Some tutoring is provided by teachers and by specialist companies, while other tutoring is provided informally by university students and others. Using a comparative lens, this book examines possible government responses to the expansion of private supplementary tutoring. In general, the book suggests, the sector should be given more attention. The work shows wide diversity in the regulations introduced by governments in the Asian region. It notes not only that these governments can learn much from each other, but also that policy makers in other parts of the world can usefully look at patterns in Asia. The book also stresses the value of partnerships between governments, tutoring providers, schools, teachers' unions, and other bodies.

Learn for Excellence: How You Can Prepare Your Children for College and Life By: Bert Lundy Learn for Excellence is a guide to the tutoring system of the same name for students in grades 1-12. The tutoring system covers Math, English, Geography, and other fundamental education tenants. The book consists of two parts. The first part explains how the tutoring system works, so that parents can help their children get an excellent education despite the state of the US education system. The second part is a compilation of related newsletters, which give additional insight into education and related areas. Professor Lundy has a B.A. in Mathematics, minoring in German and History, from Texas A&M, and a Ph.D. in Computer Science from Georgia Tech, in Atlanta. He has taught and spoken internationally—from London to Japan—and has extensive professional experience in computer science, software engineering, and networking. Through all of this experience, in 2010 he developed his specialized tutoring system, Learn for Excellence.

Why are mental developments during childhood so important to children's futures?' 'The leading premise of this book is that children's early life experiences forever shape their ability to learn, think, and conduct their adult lives.' 'International tests consistently disgrace the schooling and achievement of U.S. students. The public is either unaware of the disaster or hasn't taken it seriously, even though it's equivalent to the catastrophes of Pearl Harbor and 9/11 . . .' According to: Wayne H. Holtzman, PhD, Dean, College of Education (retired), President, Hogg Foundation for Mental Health (retired), The University of Texas at Austin: '(Al's) keen insight into the emotional socialization, learning, and creative thinking of a developing child in our ever-more complex world is indeed impressive. Any parent or teacher could profit from a careful reading of this thought-provoking book.' * * * * * Albert Yee (EdD, 1965, Stanford) has served as a distinguished classroom teacher for seven years in California and 30 years as professor of psychology and education and academic dean in America and East Asia. For his outstanding service and original research and publications, he has been elected a Fellow of the American Association for the Advancement of Science, American Psychological Association, American Psychological Society, and Society for the Psychological Study of Social Issues. Al is proud of his children's success and having raised them. His daughter is a surgery professor, specializing in breast cancer, and his son is a State Dept. Foreign Service Officer, whose recent posts have been consul general in Greece and Director, Provisional Reconstruction Teams, in Afghanistan.
