How to remove and replace excavator tracks the easy way - How to remove and replace excavator tracks the easy way by Marty T 318,626 views 6 years ago 3 minutes, 37 seconds - This video shows how to replace rubber tracks on a 1.7 ton digger, the same technique can be used for larger machines with steel ...

Lift track off ground Using the digger arm

Remove side cover and release idler adjuster nut-to slacken track

A length of wood levered from the blade will push the idler back as far as it goes

2 pry bars levered from the idler will remove the old track

Clean undercarriage, check for loose or missing bolts. Check idler, bottom roller and drive motor bearings

Position track with tread pattern pointing toward blade and sprocket teeth engaged with track links

2 pry bars used to carefully lever track over idler

Check track is seated in the centre of rollers, idler and sprocket

Tighten-track adjuster nut and tension track using a grease gun to recommended specs, mine is 1-2 cm slack below middle roller

Make sure track runs smoothly and check track tension again

The space between track and middle roller should be between 1-2 cm for these tracks

how an excavator travel drive works - how an excavator travel drive works by hystat 17,693 views 1 year ago 20 minutes - Hydraulics #hydraulicssystem #hydraulic #excavator #fluidpower #mobilehydraulics #heavyequipment #redseal.
