## **Sustainable Building Conservation**

This book incorporates UK and international case studies and essays to identify the overlaps in the interests of energy and building conservation. The relevance and adjustments of qualitative and quantitative frames of reference are introduced, alongside the various expertise of the contributors: architects, designers, conservation consultants and academics. The second part of the book showcases sustainable domestic and non-domestic heritage projects, translating the preceding research into information that practitioners can use in their everyday work. The book will appeal to architecture students, newly qualified professionals and conservation architects and will enhance readers' ambitions, so that they feel equipped and inspired to work with old buildings sensitively, creatively and sustainably.

## **Retroviral Testing**

First published in 1992, Retroviral Testing: Essentials for Quality Control and Laboratory Diagnosis is a concise, well-organized volume that discusses the background of retroviral disease, available testing technologies, test result interpretation, new testing alternatives, and essential quality control/quality assurance measures necessary for achieving accurate test results. It provides fundamental information on the epidemiology and infections caused by HIV and HTLV retroviruses, in addition to covering standards for handling blood samples. Other features include a description of immune responses to retroviral agents and a detailed examination of the principles, interpretation, usage and advantages of numerous screening and confirmatory assays. Methods to evaluate diagnostic assays and statistical methods to assess test performance are covered. The text is supplemented by 57 diagrams and 14 tables, including an extensive list of over 130 diagnostic assays for the retroviruses. Retroviral Testing: Essentials for Quality Control and Laboratory Diagnosis is an absolutely critical reference for all medical laboratories, medical technologists, educators, blood bank and immunology supervisors and personnel, and organizations such as WHO and CDC.
