Property Law

An innovative Property casebook that re-imagines the law school casebook format and covers all the major topics included in a basic 1L Property course, Property Law, Second Edition borrows some pedagogical features commonly found in undergraduate textbooks, making use of sidebars, illustrations, and other design devices to present material more clearly. The authors present concepts simply, then move the discussion toward complexity—the opposite of the approach taken by many current texts. Clear yet sophisticated, the casebook is the perfect choice for all skill levels. Including problems that students can and should be able to do on their own, explanatory answers, and skills-based exercises, this casebook is both professor-friendly and student-friendly. Themes that run through the course are highlighted throughout the book, resulting in a casebook that clearly presents the fundamentals of property law. This allows students to develop an understanding of basic concepts on their own while allowing professors to assist their students in developing an advanced understanding of property law. The authors of Property Law are experts on the property coverage on the bar exam, and while this casebook goes far beyond test-only material, students will benefit from their expertise and will learn every topic they are likely to see on the bar exam. New to the Second Edition: Additional text on racial discrimination and other critical issues in a subtle way, giving instructors the choice of how deeply to explore those issues. Revisions to Chapter 9 to include *Murr v. Wisconsin*, the Supreme Court's most recent regulatory takings case. A Revised Chapter 10 that includes new material on Intellectual Property and Property Theory. Minor corrections and refinements throughout the casebook. Professors and students will benefit from: A text that starts from simplicity and moves to complexity: The book first provides text that explains the basic doctrine, then presents a simple case example, and finally moves to more complex issues. Cases that are introduced with explanatory text discussing the law and issues surrounding the case. This radically different approach from most other casebooks allows students to have a better grasp of the concepts and themes before they even read the case. Problems and exercises that students can complete on their own, with explanatory answers included in an appendix. An innovative design that aids student learning, with sidebars, diagrams, charts, and illustrations that make concepts clearer to students. Cases that are used as examples, not introductions to legal rules. Many topics in the book feature introductory text, illustrations, and problem sets before a single case is introduced, to aid in students' legal learning. The inclusion of sample documents, helping students to understand core concepts. A book perfect for a four-credit course but also features a modular design that can be used in courses of varying credit size. More comprehensive bar exam topic coverage than any competing book.

Property Law

Property Law: Practice, Problems, and Perspectives is a truly contemporary 1L Property text. This book is distinguished by its extraordinarily clear and engaging writing, and by the degree to which the authors make material accessible to students in this foundational course. Anderson and Bogart's text is a joy to read, for both student and teacher. The authors embrace the task of training lawyers, and as a result, their text regularly asks students to answer questions and solve problems from the perspective of attorneys. The authors delve fully into legal doctrine and address profound policy issues in a direct and understandable manner. The casebook draws upon an outstanding range of case opinions, including those from seminal cases as well as

recent and provocative disputes. The text uses a two-color design and includes a wonderful selection of photographic images. Each chapter begins with an introduction that captures themes and issues that run throughout and ends with a bulleted summary of the law. Property Law: Practice, Problems, and Perspectives is NextGen Bar ready. The text covers all of the substantive topics covered on the new bar exam. Moreover, the problems and exercises train students to think of real-world applications of the material, just like the NextGen format. New “Preparing for Practice” exercises develop the skills tested on the NextGen Bar. The book’s unique online simulation resource features practice-ready materials and professionally-produced author-scripted videos that illuminate property law issues and disputes. The text regularly references documents used in practice; these documents are available to students in the simulation. New to the 3rd Edition: NextGen Bar Ready! The authors have carefully curated the substance of the book to ensure that it covers the topics tested on the new bar exam. In addition, the “Preparing for Practice” exercises throughout the book should help develop the practice-oriented thought processes and skills necessary to succeed in the new exam format. Revised and updated case opinions and textual discussion. For example, the section addressing the Fair Housing Act now includes additional discussion of disparate impact litigation after Texas Dept. of Housing and Community Affairs v. Inclusive Communities Project, Inc. Similarly, the authors updated the chapter devoted to takings law to include the latest cases, such as Cedar Point Nursery. The IP Chapter includes the 2023 Supreme Court decision on trademark protection involving Jack Daniel’s and dog toys. Enjoyable new problems drawn from the most recent reported case opinions. New problems include: the application of the takings clause to taxi licenses in the wake of Uber/Lyft; covenants against short-term rentals like VRBO and AirBnB; easements involving proposed carbon capture pipelines; the application of the Fair Housing Act to eviction based on the use of a service dog in violation of the lease; the use of part performance by a son to enforce a contract breached by his parents. Professors and students will benefit from: A blend of property doctrine and real-world practice. A stimulating, challenging presentation that is also transparent. The book retains the subtlety of the classic texts but comments explicitly on the overlapping elements to ensure that students can see all the connections among legal doctrines. Numerous examples that richly illustrate the introduction of new material. A unique interactive element that teaches students how to read a land survey. The authors present this element during the discussion of the importance of the description of real property in deeds and contracts. This exercise helps students understand the issues presented by the text in case opinions and problems. The transactional perspective adopted by the authors in chapters where that is especially relevant, such as real estate transactions and landlord/tenant law. A unique border along the edge of the text in the chapter on the real property transaction, allowing students to place key concepts and doctrinal material in the context of phases of the transaction. A robust electronic version of the casebook, along with online videos and practice-ready materials. A book that is the ideal text for a four-unit course, but includes ample coverage permitting a professor to construct a five- or six-unit course. Revealing and sometimes startling images, such as a subdivision-marketing poster from San Diego in 1915, reflecting racially-restrictive covenants -- a frightening visual example of pervasive discriminatory housing practices that existed prior to the Fair Housing Act.

Then read the entire hypo two times. Pick your answer based on the interrogatory. Read through again to make sure you did not fall for a red herring. A common MBE error is choosing your answer based only on the facts. We often choose red herrings and other deceptive answers that way. Our answer MUST be based on the interrogatory itself - the facts are the raw material behind the interrogatory. Good luck!

California Real Property Short Answer Questions for the Bar Exam

Law book There will be 24 - 34 Real Property questions on the MBE. Answering them correctly involves knowledge of WHAT IS NOT CORRECT in Real Property law. For instance it is not correct that an easement by necessity arises by agreement whenever necessary. Instead it arises when land under common ownership is split up into separate ownership and a parcel becomes landlocked as a direct result. If you know what the law IS NOT - you will pass the MBE. _____ StudyPrivatelyForTheBar.com
