This three-volume Manual on International Maritime Law presents a systematic analysis of the history and contemporary development of international maritime law by leading contributors from across the world. Prepared in cooperation with the International Maritime Law Institute, the International Maritime Organization's research and training institute, this a uniquely comprehensive study of this fundamental area of international law. Volume III is devoted to the marine environmental law and maritime security law. The first part of Volume III deals in depth with issues of most fundamental importance in the contemporary world, namely how to protect the marine environment from pollution from ships, land-based sources, seabed activities, and from or through air. In explaining these types of pollution, various conventions concluded under the auspices of the IMO (such as MARPOL 73/78 and the 1972 London Convention) and soft law documents are analysed. The volume also includes chapters on the conventions relating to pollution incident preparedness, response, cooperation, and the relevance of regional cooperation. It additionally discusses liability and compensation for pollution damage. The second part of volume III examines an issue of increasing importance in a world threatened by terrorism, piracy, and drug-trafficking. Chapters in this part

cover the topics of piracy; stowaways; human trafficking; illicit drugs; terrorism; military uses of the sea; and new maritime security threats, such as the illegal dumping of hazardous wastes and toxic substances, as well as illegal, unreported, and unregulated fishing.

The NECA Manual of Labor

This book brings together concepts from the building, environmental, behavioural and health sciences to provide an interdisciplinary understanding of office and workplace design. Today, with changes in the world of work and the relentless surge in technology, offices have emerged as the repositories of organizational symbolism, denoted by the spatial design of offices, physical settings and the built environment (architecture, urban locale). Drawing on Euclidian geometry that quantifies space as the distance between two or more points, a body of knowledge on office buildings, the concept of office and office space, and the interrelationships of spatial and behavioural attributes in office design are elucidated. Building and office work-related illnesses, namely sick building syndrome and ailments arising from the indoor environment, and the menace of musculoskeletal disorders are the alarming manifestations that critically affect employee satisfaction, morale and work outcomes. With a focus on office ergonomics, the book brings the discussion on the fundamentals of work design, with emphasis on computer workstation users. Strategic guidance of lighting systems and visual performance in workplaces are directed for better application of ergonomics and improvement in office indoor environment. It discusses the profiles of bioclimatic, indoor air quality, ventilation intervention, lighting and acoustic characteristics in office buildings. Emphasis has been given to the energy performance of buildings, and contemporary perspectives of building sustainability, such as green office building assessment schemes, and national and international building-related standards and codes. Intended for students and professionals from ergonomics, architecture, interior design, as well as construction engineers, health care professionals, and office planners, the book brings a unified overview of the health, safety and environment issues associated with the design of office buildings.

Lustrum Band 57 besteht aus Berichten über den römischen Lyriker Catull und den römischen Fabeldichter Phaedrus. Ihre Verfasserinnen, Marilyn B. Skinner und Ursula Gärtner sind international ausgewiesene Expertinnen, die die Forschungsdiskussion zu den beiden Dichtern in den letzten Jahrzehnten maßgeblich mitbestimmt haben. Marilyn B. Skinner bespricht umfassend und kritisch die Forschungsliteratur über Catull der Jahre 1985-2015, Ursula Gärtner die über Phaedrus der Jahre 1975-2014. Die kritische Diskussion übergeordneter Fragestellungen (z. B. des Problems des Autobiographischen) kommt bei beiden Berichten ebenso zur Geltung wie die Diskussion einzelner Gedichte.

Largely as a result of social policies and cultural factors, the Nordic countries continually score high in lifestyle measures, quality of life and children's outcomes. This book brings together authors from the Nordic countries (Denmark, Finland, Iceland, Norway and Sweden) to share knowledge and understanding regarding families, children, primary education and children's leisure time activities. The empirical research and theoretical contributions provide important insights into the 'Nordic model' and explore the issues facing Nordic countries. The book reveals that while there are many similarities across the countries, differences

also arise. The content of the book is more relevant now than ever, as countries look at better ways to support their populations. *Nordic Families, Children and Early Childhood Education* will be of interest to students and scholars across a range of disciplines, including Education, Sociology and Social Policy.

Author of *The Bishop's Wife*: A Utah housewife looks into the murder of a prominent Mormon—with a surprising secret—in this “fast-moving” novel (Anne Perry). In Draper, Utah, a tight-knit Latter-day Saints community is thrown into upheaval when their ward's second counselor—one of the bishop's right-hand men—is found dead in an elaborately staged murder on church property. Carl Ashby was known as a devout Mormon, a pillar of the community, and a loving husband and father. Who would want him dead? Linda Wallheim, the wife of the bishop, can't rest as long as the ward is suffering. She is particularly worried about Carl's grieving family. But the entire case is turned upside down by the autopsy report—which reveals that Carl was biologically female. In the Mormon church, where gender is considered part of a person's soul, some people regard transgenderism as one of the worst possible sins. Church officials seem to be more upset by Carl's gender than his murder, and more concerned with hushing up the story than solving the crime. Linda realizes that if the police are to catch the killer, they're going to need an ally on the inside. Carl was living a life of secrecy for twenty years. What else was he hiding—and can Linda ferret out the key to his death before the rumors tear her community apart? From the author of *The Bishop's Wife*, this is both a compelling crime novel and “a heartfelt story that opens outsiders to a fascinating world” (*The Boston Globe*).

Current Affairs Half Yearly 2021

Originating as a radio series in 1933, the Lone Ranger is a cross-media star who has appeared in comic strips, comic books, adult and juvenile novels, feature films and serials, clothing, games, toys, home furnishings, and many other consumer products. In his prime, he rivaled Mickey Mouse as one of the most successfully licensed and merchandised children's properties in the United States, while in more recent decades, the Lone Ranger has struggled to resonate with consumers, leading to efforts to rebrand the property. The Lone Ranger's eighty-year history as a lifestyle brand thus offers a perfect case study of how the fields of licensing, merchandizing, and brand management have operated within shifting industrial and sociohistorical conditions that continue to redefine how the business of entertainment functions. Deciphering how iconic characters gain and retain their status as cultural commodities, *Selling the Silver Bullet* focuses on the work done by peripheral consumer product and licensing divisions in selectively extending the characters' reach and in cultivating investment in these characters among potential stakeholders. Tracing the Lone Ranger's decades-long career as intellectual property allows Avi Santo to analyze the mechanisms that drive contemporary character licensing and entertainment brand management practices, while at the same time situating the licensing field's development within particular sociohistorical and industrial contexts. He also offers a nuanced assessment of the ways that character licensing firms and consumer product divisions have responded to changing cultural and economic conditions over the past eighty years, which will alter perceptions about the creative and managerial authority these ancillary units wield.

Calvin hatte großes Interesse daran, was die Bibel über den Menschen lehrt, wer er ist, was er tut, was seine

Rolle und Verantwortung in der Welt ist. Vom Gottesverständnis, so Johannes Calvin, lasse sich auf ein adäquates Verständnis des Menschen schließen, denn dieser sei in Gottes Ebenbild geschaffen. Geht man Calvins Verständnis von Gott näher auf den Grund, darf eine Berücksichtigung des historischen Kontextes, in dessen Rahmen sein *imago Dei* entstanden ist, nicht fehlen. Jason Van Vliet bettet seine Überlegungen in die stark humanistisch geprägte Denkweise der Renaissance, seine Interaktion mit Philipp Melanchthon und seine Auseinandersetzung mit Andreas Osiander ein und kommt schließlich zu einer genauen Profilierung des *imago Dei* des Johannes Calvin.

Doctor Strange: The Book of the Vishanti

This monograph sheds new light on the Renaissance reception of Valerius Maximus, whose collection of Memorable Deeds and Sayings - nowadays little studied - was once considered \"the most important book next to the Bible.\" Offering a close study of all the Latin commentaries on Valerius Maximus printed between 1470 and 1600, the present volume explores how his exempla were read in different times and places and in different intellectual milieus, while also enhancing our general understanding of humanist commentary - which is now, more than ever, a thriving subject of research. Alien Next Door

This book offers a vision of the future of electricity supply systems and CIGRE's views on the know-how that will be needed to manage the transition toward them. A variety of factors are driving a transition of electricity supply systems to new supply models, in particular the increasing use of renewable sources, environmental factors and developments in ICT technologies. These factors suggest that there are two possible models for power network development, and that those models are not necessarily exclusive: 1. An increasing importance of large networks for bulk transmission capable of interconnecting load regions and large centralized renewable generation resources, including offshore and of providing more interconnections between the various countries and energy markets. 2. An emergence of clusters of small, largely self-contained distribution networks, which include decentralized local generation, energy storage and active customer participation, intelligently managed so that they operate as active networks providing local active and reactive support. The electricity supply systems of the future will likely include a combination of the above two models, since additional bulk connections and active distribution networks are needed in order to reach ambitious environmental, economic and security-reliability targets. This concise yet comprehensive reference resource on technological developments for future electrical systems has been written and reviewed by experts and the Chairs of the sixteen Study Committees that form the Technical Council of CIGRE.
