Motorized Obsessions

From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent - and loud - fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it - personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

Various factors affect the performance of electrical contacts, including tribological, mechanical, electrical, and materials aspects. Although these behaviors have been studied for many years, they are not widely used or understood in practice. Combining approaches used across the globe, *Electrical Contacts: Fundamentals, Applications, and Technology* integrates advances in research and development in the tribological, material, and analytical aspects of electrical contacts with new data on electrical current transfer at the micro- and nanoscales. Taking an application-oriented approach, the authors illustrate how material characteristics, tribological behavior, and loading impact the degradation of contacts, formation of intermetallics, and overall reliability and performance. Coverage is divided broadly into three sections, with the first focused on mechanics, tribology, materials, current and heat transfer, and basic reliability issues of electrical contacts. The next section explores applications, such as power connections, electronic connections, and sliding contacts, while the final section presents the diagnostic and monitoring techniques used to investigate and measure phenomena occurring at electrical contact interfaces. Numerous references to current literature reflect the fact that this book is the most comprehensive survey in the field. Explore an impressive collection of data, theory, and practical applications in *Electrical Contacts: Fundamentals, Applications, and Technology*, a critical tool for anyone investigating or designing electrical equipment with improved performance and reliability in mind.

The Innovations in American Government Awards Program began in 1985 with a grant from the Ford Foundation to the Kennedy School of Government at Harvard to conduct a program of awards for innovations in state and local government. The foundation's objective was ambitious and, in an era of "government is the problem" rhetoric, determinedly proactive. It sought to counter declining public confidence in government by highlighting innovative and effective programs. Over twenty years later, research, recognition, and replication are the source of the program's continuing influence and its vitality. What is the future of government innovation? How can innovation enhance the quality of life for citizens and strengthen democratic governance? *Innovations in Government: Research, Recognition, and Replication* answers these questions by presenting a comprehensive approach to advancing the practice and study of innovation in government. The authors discuss new research on innovation, explore the impact of several programs that recognize innovation, and consider challenges to the replication of innovations. Contributors include Eugene Bardach (University of California– Berkeley), Robert Behn (Harvard University), John D. Donahue (Harvard University), Marta Ferreira Santos Farah (Center for Public Administration and Government, Fundação Getulio Vargas), Archon Fung (Harvard University), Jean Hartley (University of Warwick), Steven Kelman (Harvard University), Gowher Rizvi (Ash Institute for Democratic Governance and Innovation, Harvard University), Peter Spink (Center for Public Administration and Government, Fundação Getulio Vargas), and Jonathan Walters (Governing).

OGT Exit Level Reading Workbook prepares students for the reading portion of the Ohio Graduation Test. Samples from similar tests provide plenty of practice and students learn to take multiple choice tests on their comprehension of what they read. Students learn to evaluate their own short answers to targeted questions, and learn from other students' responses to similar questions. This book is suitable for students in all states who need to take a reading exam for graduation or course completion.

A busy Hollywood couple spins a hilarious cautionary tale about what happens when you are glued to your phone. It's a lively day at the neighborhood park. Birds are singing, squirrels are frolicking, dogs are causing a commotion--and wide-eyed children are enthralled by it all. Too bad the parents are missing everything! It's going to take something really BIG to get them to disengage from their phones . . . This timely story, brought to life with beautiful bold art, is a great reminder to slow down and savor time together.

Ben Brooksby is a fifth-generation farmer from St Helens Plains in western Victoria. When he was younger, he struggled with anxiety and other mental health issues, as do so many others in rural communities. A simple social media post helped him to turn things around. After he shared a photo on Instagram showing himself naked in a truck full of lentils, he received a huge response, with other farmers wanting to share their own photos - and their stories. As the Naked Farmer movement grew, Ben met people from all around the country who wanted to get naked for mental health. As they got their kits off, they also opened up about their struggles. This is a heartwarming, moving and candid collection of stories of the challenges our farmers are facing, and the way these communities are banding together in response. \ "Staff from smaller airports typically lack specialized expertise in the negotiation and development of airport property or the resources to hire consultants. ACRP Research Report 213 provides airport management, policymakers, and staff a resource for developing and leasing airport land and improvements, methodologies for determining market value and appropriate rents, and best practices for negotiating and re-evaluating current lease agreements. There are many factors that can go into the analysis, and this report reviews best practices in property development.\ "--Foreword.
